

	Management manual B U C K - C h e m i e G m b H	page 1 of 1
	Attachment 1: Corporate principles	revision no.: 00

Corporate principles

1. Productivity and product quality can be increased through continuous process improvement at all levels and with the aid of a deficiency analysis. We also contribute to the prevention, elimination or reduction of environmental pollution. An assessment of environmental pollution and energy consumption as well as environmental and energy-related targets are carried out on the basis of adequate needs, which we regard as minimum requirements. We grant compliance for all pertinent requirements. Savings in the energy sector and improvements in sustainability are evidenced by figures / data / facts.
2. Securing the company's future is to be achieved through innovative developments in accordance with environmental and quality requirements, taking account of energy-efficient production.
3. Customer satisfaction will be maintained and optimized.
4. Qualification, motivation and satisfaction of our staff is actively encouraged.
5. We want to generate a profit securing location, workplace and future.
6. We are in compliance with all legal requirements and in addition to customer requirements, e.g. resulting from contracts. This includes products safety and hygiene requirements.
7. The public will be informed about important environmental issues.
8. Conscious investment: We make our investment decisions under ecological and economic aspects. Energy savings are always in focus in order to minimize respectively avoid environmental impact.

The Management Board of Buck-Chemie GmbH in D-71083 Herrenberg, Hertzstrasse 1, accepts the statements made here and their successful implementation, it also approves the Management Manual and the 8 Guidelines and enforces them.

Herrenberg, den 19.09.2017

Werner Müller

Geschäftsführer
